news release

Water Ltd and Brightwork BV start cooperating to offer a broader portfolio

Water Limited, with offices in the UK and Brightwork BV, based in the Netherlands will start a consultancy cooperation in the United Kingdom to offer clients a broader portfolio.

Brightwork's core activities are consultancy services related to process water, waste water and sludge treatment. Key competences are within the field of process design, master and strategic planning, feasibility studies, investment and operational cost price analysis and process optimization.

Hans Wouters, one of the Brightwork partners: "Based upon our long-term experience we have full confidence we will be able to give a valuable contribution to solving complex problems of our clients. By cooperating with Water Ltd and sharing each others experience we feel we will be able to create maximum output."

Water Ltd is focusing upon operational support of treatment processes, including troubleshooting. Key competences are within the field of pollution control, monitoring, (waste) water characterisation, process design, audits.
